what is happening to the left it seems to be dying a slow death while many commentators have predicted its demise the left has always defied

these bleak prognoses and risen from the ashes in the most unexpected ways nevertheless we are witnessing today a global decline in organized movements on the left and while social struggles continue to challenge dominant political regimes these efforts do not translate into support for traditional left parties or into the creation of dynamic movements on the left bestselling historian shlomo sand argues that the global decline of the left is linked to the waning of the idea of equality that has united citizens in the past and inspired them to engage in collective action sand retraces the evolution of this idea in a wide ranging account that includes the diggers and levellers of seventeenth century england the french revolution the birth of anarchism and marxism the decolonial feminist and civil rights revolts and the left wing populism of our time in piecing together the thinkers and movements that built the left over centuries sand illuminates the global and transnational dynamics which pushed them forward he outlines how they shaped the notion of equality while also analysing how they were confronted by its material reality and the lessons that they did or did not draw from this this concise and magisterial history of the left will appeal to anyone interested in the idea of equality and the fate of one of the most important movements that has shaped the modern world also available as an audiobook

a third edition of this book is now available now in a fully revised and updated edition this concise and insightful book explores the ways american popular products such as movies music television programs fast food sports and even clothing styles have molded and continue to influence modern globalization lane crothers offers a thoughtful examination of both the appeal of american products worldwide and the fear and rejection they induce in many people and nations around the world concluding with a projection of the future impact of american popular culture this book makes a powerful argument for its central role in shaping global politics and economic development

the edu usa club members have no intention of missing out on the inaugural test flight expedition they stealthily boarded phantom star and succeed in experiencing time travel to another world unfortunately disaster meets them in a debilitating crash landing a domino effect of complex problems welcomes the group and they are forced to reach out for help from the local aliens only to end up imprisoned under a communist ruled dictatorship the edu usa club members must find help fix and learn to maneuver the transporter vessel and help the everyone escape will they successfully deal with the challenges they face and return home safely or will they be trapped forever in an oppressive society that none can survive

the purpose of this collection is to provide a forum to integrate pre clinical and clinical investigations regarding the long term consequences of adolescent exposure to drugs of abuse adolescence is characterized by numerous behavioral and biological changes including substantial neurodevelopment behaviorally adolescents are more likely to engage in risky activities and make impulsive decisions as such the majority of substance use begins in adolescence and an earlier age of onset of use 15 yr is strongly associated with the risk for developing a substance use disorder later in life furthermore adolescent drug use may negatively impact ongoing neurological development which could lead to long term

cognitive and emotional deficits a large number of clinical studies have investigated both the acute and long term effects of adolescent drug use on functional outcomes however the clinical literature contains many conflicting findings and is often hampered by the inability to know if functional differences existed prior to drug use moreover in human populations it is often very difficult to control for the numerous types of drugs doses and combinations used not to mention the many other environmental factors that may influence adult behavior therefore an increase in the number of carefully controlled studies using relevant animal models has the potential to clarify which adolescent experiences particularly what drugs used when have long term negative consequences despite the advantages of animal model systems in clarifying these issues the majority of pre clinical addiction research over the past 50 years has been conducted in adult animals moreover few addiction related studies have investigated the long term neurocognitive consequences of drug exposure at any age in the past 10 years of so however the field of adolescent drug abuse research has burgeoned to date the majority of this research has focused on adolescent alcohol exposure using a variety of animal models the results have given the field important insight into why adolescents are more likely to drink alcohol to excess relative to adults and the danger of adolescent alcohol use e g in leading to a persistence of excessive drinking in adulthood more recently research regarding the effects of adolescent exposure to other drugs of abuse including nicotine cocaine and cannabinoids has expanded therefore we are at unique point in time when emerging results from carefully controlled pre clinical studies can inform the sometimes confusing clinical literature in addition we expect an influx of prospective clinical studies in response to a cross institute initiative at nih known as the abcd grant several institutes are enrolling children prior to adolescence and the initiation of drug use in order to control for pre existing neurobiological and neurobehavioral differences and to monitor the age of initiation and amount of drug used more carefully than is possible using retrospective designs

this book constitutes the refereed proceedings of the 15th european pvm mpi users group meeting held in dublin ireland in september 2008 the 29 revised full papers presented together with abstracts of 7 invited contributions 1 tutorial paper and 8 poster papers were carefully reviewed and selected from 55 submissions the papers are organized in topical sections on applications collective operations library internals message passing for multi core and mutlithreaded architectures mpi datatypes mpi i o synchronisation issues in point to point and one sided communications tools and verification of message passing programs the volume is rounded off with 4 contributions to the special parsim session on current trends in numerical simulation for parallel engineering environments

the world s leading alien hunter new york times magazine from acclaimed harvard astrophysicist and bestselling author of extraterrestrial comes a mind expanding new book explaining why becoming an interstellar species is imperative for humanity s survival and detailing a game plan for how we can settle among the stars in the new york times bestseller extraterrestrial avi loeb the longest serving chair of harvard s astronomy department presented a theory that shook the scientific community our solar system loeb claimed had likely been visited by a piece of advanced

alien technology from a distant star this provocative and persuasive argument opened millions of minds internationally to the vast possibilities of our universe and the existence of intelligent life beyond earth but a crucial question remained now that we are aware of the existence of extraterrestrial life what do we do next how do we prepare ourselves for interaction with interstellar extraterrestrial civilization how can our species become interstellar now loeb tackles these questions in a revelatory powerful call to arms that reimagines the idea of contact with extraterrestrial civilizations dismantling our science fiction fueled visions of a human and alien life encounter interstellar provides a realistic and practical blueprint for how such an interaction might actually occur resetting our cultural understanding and expectation of what it means to identify an extraterrestrial object from awe inspiring searches for extraterrestrial technology to the heated debate of the existence of unidentified aerial phenomena loeb provides a thrilling front row view of the monumental progress in science and technology currently preparing us for contact he also lays out the profound implications of becoming or not becoming interstellar in an urgent eloquent appeal for more proactive engagement with the world beyond ours he powerfully contends why we must seek out other life forms and in the process choose who and what we are within the universe combining cutting edge science physics and philosophy interstellar revolutionizes the approach to our search for extraterrestrial life and our preparation for its discovery in this eye opening necessary look at our future avi loeb artfully and expertly raises some of the most important questions facing us as humans and proves once again that scientific curiosity is the key to our survival
